Rev. Diane of The Sanctuary

Live Your Best Life!

Hello Diane!

Your New Moon Magick Working

New Moon In Cancer July 5

Sextile Mars - Nice

Trine Saturn - Real nice

On a Venus day - Cool

A New Moon in Cancer typically addresses home, family, and emotions. However this New Moon in Cancer offers so much more thanks to other the position of other planets.

This astrological passage describes a powerful New Moon with the Sun and Moon in Cancer. Since the Moon is strong in its home sign (Cancer), it's a good time to take charge and assert yourself. Positive influences from Venus, Saturn, Mars, Uranus, and Neptune follow the new moon, creating a favorable period for financial decisions.

Here's a breakdown of the good vibes:

- You have the power to make changes that benefit your wallet in the long run.
- Spending strategically can be positive.
- Be creative and explore new approaches.
- There might be some unconventional situations (Mars, Uranus), but stay ethical and success is likely.
-

Overall, it's a green light for taking financial action, but remember to play by the rules.

I Am Grateful for
new financial
opportunities,
financial stability,
and financial
freedom!

Crystals in the mix

For this work, I am recommending three stones.

- Lapis Lazuli - Associated with the Moon and attracting success by staying true to one's self.
- Amethyst - Associated with the Moon and a gentle guide toward wealth and abundance.

southeast corner of your home.

The Ritual

At the appropriate time, light the candles. Place a drop of orange oil on each of the candles.

Write down the affirmation. Write it three times, one of those three times on a post it note to place on your bathroom mirror. Burn one of the written affirmations, either in your fireplace or kitchen sink. Place the third written affirmation in your pocket during the day, under your pillow when you sleep.

Speak the affirmation out loud. Vision the outcome you seek. Allow yourself to feel what having this come to you will be like.

Let the candles burn down all the way, and place any residual wax in the fire place. If a fireplace is not available, bury the material.

It is done.

Keep the Lapis Lazuli with you. In your pocket by day, under your pillow when you are asleep. Whenever you think about your desired outcome after this work, stop yourself from any negative thoughts by re-envisioning the outcome and giving thanks.
